ABSOLUTELY PURE

BRECKENRIDGE NEWS.

WEDNESDAY, MAY 22, 1895.

Continued from page 1.

BLACKBURN.

Will Ellis said he was not wanted until there was a platform for him to stand on.

Rhea and Ellis were on the reporter's table.

"Sit Rhea down!" demanded a loud-voiced man.

"There is no Sergeant-at-Arms and no man in this hall that can put me down, by God," answered Rhea.

Ellis demanded to know if it was in order for a Democratic convention to declare Democratic principles.

"Free speech! No gag-law!" was the cry for fifteen minutes, while the Secretary was trying to take the vote by counties. The delegates could not be heard, so they went to the Secretary's desk and began to vote down the adjourning resolution. This being apparent Rhea and the silver men let up in the noise.

Judge Reeves stood by the chair counseling and advising him. The Secretary announced the vote to be 161 against adjourning 99 for it.

Rhea was still on the table, and on the announcement of the vote the Chair recognized Mr. Rhea. The free silver men had won. There was quiet and order. Rhea started on one of his characteristic speeches, roasting the opposition for being ashamed to see the man it had just nominated. He referred to Mr. Cleveland as the "alleged President," and then spoke to the silver plank in the resolutions he had presented.

Call of counties was now ordered on voting for the resolutions as a whole or separately, and the silver men again won by pretty much the same vote, the resolutions being ordered taken up as a whole.

Mr. Wheeler then moved that the resolutions be adopted as a whole. The opposition weakened, and the resolutions were adopted unanimously by a viva voce vote.

A lady at Tooleys, La., was very sick with bilious colic when M. C. Tisler, a prominent merchant of the town gave her a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says she was well in forty minutes after taking the first dose. For sale by A. R. Fisher, Cloverport, Ky., and Kinchloe & Board, Hardinsburg, Ky.

OLD CHATTER BOX.

The naturalists, or those who observe nature most closely, see more easily and more certainly the plausibility in the Darwinian theory. No where, is the theory of evolution better exemplified, than in the vegetable kingdom. The scientific florist compares the wild rose that grows by the wayside, and among the wild cliffs, with the Marchal and American Beauty in his garden.

He notices the improvement or advancement, in size, color and even fragrance, from the pale, single, orderless wild rose to the large, rich-hued and fragrant American Beauty.

We cannot call this scientific cultivation alone—it is the evolution or unfolding of nature brought out by cultivation.

The horticulturist sees the improvement in his vegetable garden by proper cultivation, and planting. The agriculturist can tell us of the great advancement made in the quality of his grain. All this is due to the scientific unfolding of nature.

And so it is with the animal kingdom. By proper training and scientific management, see the advancement from the wild pony to the race horse that attracts thousands to the race course to see his speed tested. Compare the tiny Shetland pony with the powerful Norman, and mark the development. Also the canine race—Once an ugly mongrel, now note the different species of canines, from the English Mastiff to the lady's pet Poodle.

Doubtless the same comparisons may be made in the human race. How wonderful the change from the man with a caudal appendage to giant intellects of today with a brain that weighs 80 ounces.

But this improvement or advancement in nature is not altogether due to the scientific cultivation of man. Evidently an Almighty in the beginning left nature in an embryonic state, as it were, in all his handiwork. It was His intention, no doubt, that man should unfold and develop this nature from its hidden state. It was this expectation that all nature advance and not retrograde. Hence, we repeat that the wonderful improvement in nature is not the work of man alone. The scientific farmer selects the best seeds for planting, the careless farmer allows his grain to degenerate.

The unscientific florist allows his Jacquinet to return to the wild rose of the woods. The tricolor rose to go back to the unnoticed wild flower.

The animal kingdom will also degenerate without proper attention, and become deformed. Cut off all the dogs' tails a few generations and the country will be full of bob-tailed dogs. Deprive cattle of their horns and in a few years we will have nothing but hornless cattle. Don't allow the plumage of the attractive peacock to develop, and after awhile, this species of fowl will become extinct, for the peafowl, like a society woman, had rather be dead than to be without pretty feathers.

The human race is liable to deteriorate unless we are more temperate and more regular in our habits which as I said, is contrary to the intention of an Almighty. Unless there is a check in intemperance, a change from the present mode of living, and a reform in dress, the human race will continue to degenerate 'till finally the tail will grow out again.

There are not the great minds in the world to-day that there once were. There is no Webster now—no Homers or Shakespeares. And to come on down the literary world there are very few Tennysons or Longfellowes.

The musical world knows no Mozarts or Wagners or Webbers. And where are the architects that can build an Egyptian pyramid? All this goes to prove that the human family is degenerating or retrograding.

Nothing destroys health faster or more certainly than intemperance in eating and drinking, and nothing impairs the mind quicker than bad health. Those who sleep all day and dissipate all night are on the downward road to fill health.

Sit up and eat indigestibles all night and sleep all day and the mind will rapidly grow stupid. Deformity is caused by improper dress. If men continue to allow the barber to shave their heads, they will, in another generation be as bald as a monkey. And if women continue to wear bangs and deform themselves by tight lacing, how long will it be before the human family will be back to where Darwin says we started?

E. W. Bagby, a prominent lawyer of Paducah, Ky., says that Dr. Bell's Pine Tar Honey cured his children of whooping cough when all things else failed. It's a new remedy for all coughs. For sale by Short & Haynes, Cloverport; Dr. R. H. McMullin, McDaniels; M. Meyer & Co., Buras; A. Taylor, Rosetta; W. E. Brown, Irvington, Ky.; A. A. Richardson, Garfield, Ky.; A. R. Morris, Big Spring, Ky.; W. C. Moorman, Glendene, Ky.; P. Sherron, Bros. & Co., Kirk, Ky.; Horace Scott, Hardinsburg, Ky.

BIG SPRING.

Dr. Strother is in Louisville this week on business.

Mrs. Miller has returned to her home in Hardinsburg.

Mrs. E. W. Jones is visiting her mother and sister at Henderson.

The frost played havoc with gardens in this neighborhood last week.

Mr. Burr Sanders, of Elizabethtown, was the guest of Dr. and Mrs. Gray last week.

Quite a number of our young people attended quarterly meeting at Howels last Sunday.

Miss Bettie Clarkson has returned home after a short stay in Brandenburg and Louisville.

Rev. J. M. Street filled his regular appointment at the Baptist church last Saturday and Sunday.

Miss Clara Smith, who is in charge of the millinery department at Jacob & Meyer's, is trimming the hats in latest styles and ladies will do well to call and see her. Prices reasonable.

Every person, big, little, old or young, black or white, rich or poor, who has ever used Dr. Bell's Pine Tar Honey pronounce it the best cough and lung remedy on earth. It's true, too, so we guarantee. For sale by Short & Haynes, Cloverport; Dr. R. H. McMullin, McDaniels; M. Meyer & Co., Buras; A. Taylor, Rosetta; Ky.; W. E. Brown, Irvington, Ky.; A. A. Richardson, Garfield, Ky.; A. R. Morris, Big Spring, Ky.; W. C. Moorman, Glendene, Ky.; P. Sherron, Bros. & Co., Kirk, Ky.; Horace Scott, Hardinsburg, Ky.

The Price of a Peacoe.

The statement that "it is the intention of Lord Rosebery to create no more peers" may be taken at a very low valuation. In the first place, if he had formed any such intention, he would hardly be likely to make it public, because, in the second place, any such announcement would have a disastrous effect upon the party war chest. It is rather brutal perhaps to talk about the "price of a peerage," but it is a fact that nearly every peer created in recent times for political services has contributed at least £10,000 to the funds of his party.—London Figaro.

Last of the Valkyrie.

The case of great Cusar dead and turned to clay stopping a hole to keep the wind away is paralleled by the ultimate destination of the ill fated Valkyrie. The materials of Lord Dunraven's boat, which, as all will remember, was sold for a mere song after she was dug up from the bottom of the Clyde, are now fulfilling their destiny as component parts of a "switchback" on a Glasgow fair ground.—Glasgow Letter.

BEFORE I could get relief from a most horrible blood disease, I had spent hundreds of dollars TRYING various remedies and physicians, none of which did me any good. My finger nails came off, and my hair came out, leaving me perfectly bald. I then went to

HOT SPRINGS

Hoping to be cured by this celebrated treatment, but very soon became disgusted, and decided to TRY the effect of S.S.S. I commenced to recover after taking the first bottle, and by the time I had taken twelve bottles I was entirely cured by S.S.S. when the world-renowned Hot Springs had failed.

W. S. Loomis, Shreveport, La.

SWIFT SPECIFIC CO., ALBANY, GA.

Monthly Crop Report.

The reports of the statistical correspondence to the office this month has been unusually large, and from these returns I am justified in saying that the condition of all crops has advanced very greatly since the last report. The weather has been favorable for grain and grasses of all kinds, and for all kinds of farm work, and the farmer is well advanced in spring work. The prospect for better prices are much better than last season; quite a number of farmers have engaged their wheat at threshing time at 50 cents per bushel, but many others are holding, and from present prices they have good prospects for realizing more money. The report for wheat one month ago was 90; to day it stands at 96 percent, an advance of 6 points. There are many diseases, however, to which it is liable in the next thirty days. The time for the fly to show itself and for rust to strike it, is just before ripening or just before harvest. I will quote the remarks from different parts of the State. From the county of Christian Dr. Clardy writes: "Had good rains; prospects for good crop seem to be better; elegant stand of young clover; was a partial failure last year; some trouble from worms; not serious here yet." From the county of Carroll: "All farm prospects are 100 per cent, compared to 1894." From the county of Caldwell: "Wheat looks well; tobacco buds never looked better; cut worms very bad; some early corn will have to be planted over." From the county of Campbell: "Wheat and other grains come out wonderfully since last report; fields that looked bare months ago look like will make large yields." From the county of Woodford: "Wheat, rye, barley and oats excellent growth; young clover splendid catch." The Hon. C. L. Searcy, of Madison county, writes: "Prospects good for all kinds of crops; farmers feeling good." From the county of Harrison: "Wheat rank and of fine color; a little spotted." From the county of Union: "Farmers all happy; corn is being put in rapidly; ground in good condition; weather fine and prospects for good crops here never better."

RYE.

The reports on rye are not so full as wheat—nearly every county reporting as to the latter. The average being several points under that of wheat. Being raised principally for pasture, is usually grazed very hard through the winter, consequently it does not look as well as wheat at this time of year. The condition is placed at 93 per cent.

BARLEY.

The condition of barley is placed at 91.5.

MEADOW MOWING LANDS.

Have improved wonderfully since last report. Most correspondents place the condition at 90; some considerably over that, but a few, however, make very low reports, which brings the average down. I take it, from the general tone of the correspondents, that there will be a good hay crop. The condition is 92 per cent.

CLOVER.

As well as hemp, oats and tobacco beds, are suffering from the ravages of the "cut worm" and "army worm." I could quote the reports from a large number of correspondents, not confined to any particular locality, all complaining of the cut worm and army worm. In a number of counties whole fields of clover have been destroyed by them, and the early planted corn will have to be replanted again. Some farmers who have escaped them are happy and the others despondent. The condition of clover is placed at 89 per cent.

PASTURES.

Which includes blue grass and all kinds of grazing lands, are very short for this time of year—have not made much growth until the past ten or fifteen days. The per cent. is placed at 87.

OATS.

Over an average crop has been sown, and where the worms have not infested it is looking well. The condition is 94 per cent.

TOBACCO.

Some correspondents write that so much destruction has been done to the beds by the worms that there will not be a full crop planted. The acreage is placed at 92 per cent.

HEMP.

The average acreage of hemp is placed at 92 per cent.

HOGS.

There has been a gain in hogs since the last report. The last was 99 per cent. The per cent. to-day is placed at 98.

CATTLE.

The returns will show a shortage of cattle, which is evidently due to the hard winter and the scarcity of winter feed. The returns show an increase of 2 points since last report. The per cent. for this month is placed at 81.

SHEEP.

The figures from correspondents show a marked shortage of sheep. Quite a number contribute it to the low prices of sheep and wool. The winter has been very severe on lambs. The per cent. is placed at 79.

MULES.

The very low price of mules has caused the farmer to neglect them, which has decreased the comparative number. The per cent. is placed at 89.

HORSES.

The number of horses is well maintained. The per cent. is placed at 95.

FRUIT.

The correspondents report an abundant crop of all kinds of fruit except peaches, cherries and plums.

NICHOLAS McDOWELL.

Frankfort, May 7, 1895.

The way to cure a cough is to stop the coughing. Dr. Bell's Pine Tar Honey cuts loose the mucous, heals the lungs and bronchial tubes quickly. Cures grip cough in one night. For sale by Short & Haynes, Cloverport; Dr. R. H. McMullin, McDaniels; M. Meyer & Co., Buras; A. Taylor, Rosetta; W. E. Brown, Irvington, Ky.; A. A. Richardson, Garfield, Ky.; A. R. Morris, Big Spring, Ky.; W. C. Moorman, Glendene, Ky.; P. Sherron, Bros. & Co., Kirk, Ky.; Horace Scott, Hardinsburg, Ky.

Children Cry for

Pitcher's Castoria.

BEWLEYVILLE.

Jesse Payne, who has been attending school in Hardinsburg, returned home Friday.

Miss Ida Shumate, of Hill Grove, has been visiting Miss Mary Paul for a few days.

Mrs. Kate Parloe, of Garrettsville, is visiting her mother, Mrs. Triplett. Mrs. Parloe was formerly of this place, and she always gets a cordial welcome.

Mrs. P. W. Foote went to Guston last Monday trading.

T. J. Jolly visited relatives at Sample, Union Star and Lodi last week.

David Hardaway left this week for Jefferson county, where he will work for Mr. William Moorman.

Mrs. Eliza Jolly, Hardinsburg, was the guest of Bion Jolly a few days the latter part of last week.

Miss Cain, daughter of John Cain, of Big Spring community, attended church here Sunday.

Misses Blanche Jolly, Lena Drury, Florence Cain, Mary Paul and Hattie McCoy and Roy Cain, George Drury, Pierce Hardaway, Wade Dury and several others attended the entertainment at Irvington Saturday night. They report a good time, and are under obligations to Irvington for ices and other similar treats.

On Wednesday last while Mr. Dolf Jordan was burning off a new ground his tobacco barn close by caught fire and burned to the ground. The barn contained a stack of hay and some other things belonging to J. M. Harlaway. We give them our sympathy.

Not to forget the "woman," I want to say that a day or two ago I read that in China twenty years ago, the price of a pretty good sort of a wife was \$25, now the price has increased to \$250. This shows that woman is on the up-grade elsewhere than in the United States.

"Green leaves and blossoms and sunny warm weather."

And singing and loving all come back together! Is a little complaint that has been beautifully fulfilled for several weeks, but Saturday last sent us again into winter quarters. Nothing in the way of weather could be lovelier than that we have enjoyed this Spring, and these cooling breezes are just a pleasant change. However, it takes a very hopeful spirit to enjoy any of these things, with this army of crawling creatures at our feet. We are reminded of the days of plagues in Egypt. What to do is becoming a very serious question.

Our Epworth League is still in good working order. Just at present though we are having no literary meetings, having decided to join in with the Sunday School in preparation for Children's Day exercises. The design of these things is to bring our young people and children out from the monotony of every day country life, and give them opportunities of education and culture for both mind and heart. We, who are in the work, hope our good people will not only wish us well, but join us and help wherever help is needed.

For Sunday, May 12th, our services were Sabbath school, conducted by superintendent T. J. Jolly. Preaching in Baptist church at 11 o'clock by Bro. Snyder, his subject being, "Family and Personal Religion." Epworth League devotional meeting in the afternoon led by Overton Blanford. At our League meeting the parable of the Talents was brought before our minds, and in looking back over the day I trust the Christian people of Bewleyville have improved whatever of talent they may possess.

GOLDEN RON.

The Discovery Saved His Life.

Mr. G. Caillouette, Druggist, Beaverville, Ill., says: "To Dr. King's New Discovery I owe my life. Was taken with La Grippe and tried all the physicians for miles about, but of no avail and was given up and told I could not live. Having Dr. King's New Discovery in my store I sent for a bottle and began its use and from the first dose began to get better, and after using three bottles was up and about again. It is worth its weight in gold. We won't keep store or house without it." Get a free trial at A. R. Fisher's drug store.

DUKE'S.

Miss Mary Dawson was in town Wednesday shopping.

Mr. Nathan Starks came up to Duke's to-day on business.

Born, May the 11th, to the wife of Jerry Basham, a fine boy.

Mr. Dave Isome, wife and baby were the guests of Mr. and Mrs. James Jarboe Sunday.

John Ashby, Tom Pate and little son, Jesse, were the guests of W. T. Burnett Sunday.

Mr. Gordon Dunn was in town to-day buying a new supply of garden seed. Oh, you little pests.

Mr. and Mrs. S. B. Burnett went to Davies county, Friday, to visit their daughter, Mrs. Louisa Rowland.

John K. Johnson says the cut-worms have entirely devastated his garden and expects them to commence on the posts and pickets.

Miss Maud Rowland, Mr. Dave Rowland, Mr. Kearny Peacock and wife, of Davies county, are visiting relatives at this place.

James Harris, while barrowing the other day, his horses became entangled in some way, got frightened and ran away. Luckily no damage was done.

Winter stole upon us very sad early Saturday morning, causing us to bustle around hunting up our winter wraps that had been put away as we thought, until the appearance of a new winter.

Mr. Finly Barnett and Mr. James Harris went fishing Thursday night, but luck seemed to be against them. The species of fish that is found on a pond is wiser than the funny tribe and are harder to catch.

Children Cry for

Pitcher's Castoria.

Rev. A. F. Dadsman filled his regular appointment at the Presbyterian church Saturday night and Sunday. The text he selected for his Sunday sermon can be found by turning to the fourteenth chapter of Romans, twelfth verse, which he handled very fluently and with much force.

Several of our young ladies and gentlemen took a pleasure trip to the Tar Springs Sunday, to drink of the invigorating waters that nature has planted at that place. Not being versed in chemistry I know not what medicinal parts the waters contain, but think they have a tendency to alleviate serious cases of heart trouble.

Some farmers have to plant their corn over again, on account of the cut-worms. It seems that the farmers row is always a hard one, he has to confront every obstacle. Combinations of every article that the farmer produces, is pressing him every year closer and closer to the wall. The law-maker says the drought, the hot winds, the late and early frosts, are not enough incumbrances; they will draw the line of taxation one knot tighter around him. So year after year the farmers (and all laboring classes) are stepping down from freedom into slavery, and will continue so until they rightly awake to their own interests.

Good Old Granny Metcalf, 85 years old living at 618 Monroe street, Paducah, Ky., says that Dr. Bell's Pine Tar Honey is the best grip cure, cough, lung and bronchial remedy that has been offered to the people during her life. Guaranteed and sold by Short & Haynes, Cloverport; Dr. R. H. McMullin, McDaniels; M. Meyer & Co., Buras; A. Taylor, Rosetta; W. E. Brown, Irvington, Ky.; A. A. Richardson, Garfield, Ky.; A. R. Morris, Big Spring, Ky.; W. C. Moorman, Glendene, Ky.; P. Sherron, Bros. & Co., Kirk, Ky.; Horace Scott, Hardinsburg, Ky.

The Dumping-Ground Theory.

Perhaps the most plausible argument, the shrewdest plea, advanced by the single standard lovers in defense of their unworthy cause is the declaration that the opening of our mints to free coinage means the conversion of the United States into a silver dumping-ground for the world. While the Times does not believe that any such good fortune awaits us, it is well enough to investigate the dumping-ground theory.

It is conceded on all hands that Europe has no surplus silver, and this position is impregnable fortified by the fact that she yearly purchases large quantities of bullion from silver-producing nations for domestic consumption. The amount of silver bullion and bar-silver last year exported to Europe from American silver mines amounted to \$51,000,000. Besides this, the European coinage-ratio is 15 to 1, and the American 16 to 1, thus entailing a positive loss to the European silver holder who sends his coin or bullion to American mints. In addition, freight charges, occasional losses in shipments, abrasions, melting to separate foreign alloy and melting to infuse American alloy, is estimated at about thirty per cent. on each dollar's worth of foreign silver. It is entirely safe to say that there will be, there can be, no dump of silver from Europe.

There are only two countries in the world which produce a surplus of silver. These nations are Mexico and the United States. The first named country last year sold her total production of silver, with the exception of \$6,000,000, to Europe. With this six millions of dollars she is expected to deluge the United States and supply her own coinage demands.

Where is the silver that is to be dumped coming from? It is not in sight; it is not in existence. It is to be found only in the imagination of those who, for a purpose or through ignorance, are shouting against silver.

In 1893, silver to the amount of \$77,555,737, it is officially announced by the Director of the Mint, was produced in the mines of the United States. Of this amount, 51,000,000 in silver ores and bars was exported to Europe, and \$13,000,000 consumed in manufactures and arts during the year, leaving only \$13,000,000 in surplus silver to be accounted for.

These figures, collated from the highest financial authority known, are simply indisputable and, to every unbiased mind convincing. There is no surplus, but rather a deficiency of silver at present; with the opening of the mints to free coinage so great would be the demand for silver, that it would at once go to a parity with gold in intrinsic value.

There is nothing in the dumping-ground theory, just as there is nothing to the harm of silver in any of the arguments brought forward by the buzzing gold bugs.—Glasgow Times.

MINISTERS OF THE GOSPEL

ENDORSE

Electropoise.

Rev. John Rodgers, Danville, Ky.

It is a mystery to me, almost a miracle.

Rev. S. Meek, Cynthiana, Ky.

I have used the Electropoise for five years and find it invaluable as a curative agent, especially in cases of feeble women and delicate children.

Rev. Robert Barrett, Louisville Baptist Seminary.

Electropoise cured after all other remedies failed.

Rev. W. W. Bruce, Hustonville, Ky.

Electropoise cured opium habit.

Rev. Geo. Means, Covington, Ky.

In one night the Electropoise relieved brain congestion and vertigo.

We could fill this paper with similar reports, but think this sufficient to interest you in sending for book on the subject of health. Electropoise rented four months for \$10.
